

Appl. No. : 10/658,093
Filed : September 9, 2003

REMARKS

Claims 73-106 have been added. Support for the new claims can be found in the specification and claims as filed, for example, Claims 1-72 and the following paragraphs from the Specification as filed: Claims that recite an AU-rich element are supported in paragraphs 105, 175, 266, 294, 321, 324, 341, and 352; Claims that recite the sequence set forth in SEQ ID NO:1 are supported in paragraphs 78, 83, 84, 188, 266, 295, 316, and 319; Claims that recite a polypeptide comprising a PEST sequence are supported by original claims 6 and 28; Claims that recite a luciferase as the reporter are supported by original claim 46; Claims that recite Renilla luciferase are supported by paragraphs 76, 77, 86, 87, 95, 97, 98, 143, 187, and 372; Claims that recite firefly luciferase are supported by paragraphs 76, 77, 83, 94, 97, 122, 128, 303, and 372; Claims that recite a multiple cloning site, a polyadenylation site, a selectable marker gene, or an origin of replication are supported by Claim 40; Claims that recite an SV40 polyadenylation sequence are supported in paragraphs 100, 374, and 375; Claims that recite an ampicillin resistance gene are supported in paragraphs 187, 246, and 297.

The changes made to the Specification and Claims by the current amendment, including ~~deletions~~ and additions, are shown herein with deletions designated with a strikethrough and additions underlined. No new matter has been added herewith.

Conclusion

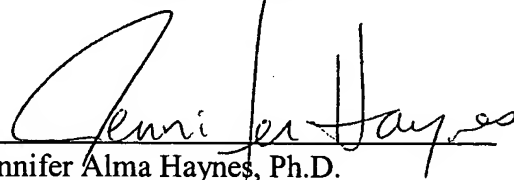

Should the Examiner have any questions which might delay prosecution of the above-captioned patent application, the Examiner is respectfully invited to contact the undersigned at the telephone number appearing below.

Please charge any additional fees, including any fees for additional extension of time, or credit overpayment to Deposit Account No. 11-1410.

Respectfully submitted,

KNOBBE, MARTENS, OLSON & BEAR, LLP
